

Intex

Intex Access Panel Range:
Sound Rated RW31-34

MDF DATA SHEET

WARNING: User must read and understand instructional manual.

How to apply paint to our MDF Sound Rated Access Panels?

Our years of experience have exposed us to a popular misconception about MDF products which is, "that unlike solid wood, "MDF is stable; it won't expand and contract". This seems to be a commonly held belief, although as many of you already know, it is incorrect. As with solid wood, MDF is a hygroscopic material (meaning it readily takes up and retains moisture), thus its moisture content depends on the relative humidity and air temperature in the surrounding environment. As the moisture content of MDF changes, it is subject to dimensional changes.

Sealing and painting MDF should be done before exposed to any moisture. Recommended to be painted before installation to avoid dimension changes. Light sand of frame and MDF door before undercoating. Sand edges of the MDF before painting.

Undercoating

Water based paint

3 in one undercoat water base primer

Recommended brands

Dulux

Taubmans

Wattle

Oils based

Zinzer oil based primer

Recommended 2 to 3 coats of paint after undercoat
